SUMMARY

MERN stack developer with hands-on experience in creating dynamic, end-to-end web applications using React, Node.js, Express, and MongoDB.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, C++

- **Frontend Technologies:** HTML, CSS, React.js, Next.js, MUI, Tailwind CSS, Bootstrap, Styled Components, Yup

- **Backend & APIs:** Node.js, Express, GraphQL, Apollo Client & Server, RESTful APIs

- **Databases:** MongoDB, MySQL, PostgreSQL

- **Tools & Platforms:** Git, GitHub, Bitbucket, Stack Overflow, VS Code, Ubuntu Linux, Windows, Jest

WORK EXPERIENCE

Pixako Technologies – Software Engineer Intern   **07/2025 – 09/2025**

- Developed a complete Job CRUD with React.js, Material UI, React Hook Form, and Yup.

- Migrated project to Next.js with TypeScript and integrated Node.js + MongoDB REST APIs.

- Upgraded backend to GraphQL with Mongoose, Apollo, and Auth0 for real-time updates.

- Collaborated on a Truck Management System, merging Job & Vehicle modules, adding Allocation features, and building a PWA to update job statuses in real time.

EdgyDev – Mern Intern   **07/2024 – 08/2024**

- Built responsive UIs using React.js with functional components and Hooks**.**

- Designed RESTful APIs with Node.js and Express.js and integrated them into React using Axios.

- Integrated MongoDB with Mongoose for schema design, models, and CRUD operations.

PROJECTS

[Link] Truck Management System

- Developed a full-stack truck management platform with real-time updates using GraphQL subscriptions.

- Built a Next.js + React frontend with Material UI, map integration, PWA support, and form validation.

- Implemented Node.js + Apollo Server backend with JWT authentication and MongoDB database.

- Added core modules for Job, Vehicle, and Allocation management to streamline logistics operations.

[Link] Auction Platform

- Developed a full-stack MERN-based auction platform enabling smooth auction creation and bidding workflows.

- Implemented secure user authentication with role-based access for Auctioneers, Bidders, and Admins.

- Utilized Redux Toolkit for state management and integrated Stripe for payment processing.

- Designed intuitive user interfaces for browsing, placing bids, and managing auctions.

- Automated tasks using cron jobs for commission verification and auction status updates.

EDUCATION

University of Haripur | BS Computer Science Degree   **09/2021 – 06/2025**
